

TO: ALL ATLANTIC IMAGING GROUP IMAGING CENTERS

FROM: DENISE KANZE, VICE PRESIDENT OF NETWORK SERVICES

DATE: MARCH 17, 2000

SUBJECT: INTERNET ACCESSIBILITY

In anticipation of our upcoming mandatory meeting of all of the Atlantic Imaging Group Providers on Wednesday, March 29, 2000 at 7:00 PM at the PNC (Garden State) Arts Center in Holmdel, New Jersey and the new Internet billing system all ATLANTIC IMAGING GROUP IMAGING CENTERS must have Internet Access in order to receive direct referrals from ATLANTIC IMAGING GROUP.

If your facility does not have Internet capabilities, please use the following suggestions for procuring this capability:

- Cable or DSL service provide the fastest Internet speed.
- At a minimum, a 56k baud modem connection and a dedicated fax/modem line is required.
- Microsoft Explorer 5.0 as you Browser
- For direct dial-up connection to an Internet Service Provider (ISP) such as ATT.net or BellAtlantic.net is preferred.
- Commercial On-Line services such as AOL, MSN, Prodigy, CompuServe are not recommended due to their proprietary Browsers and decreased speed.

Please remember, the purpose of the Internet based HCFA system is to accurately submit claims and speed reimbursements for your services. All ATLANTIC IMAGING GROUP Clients will receive claims via this superior technology.

In the meantime, referrals for Liberty Mutual Patients will only be made directly to centers currently having Internet capability. Please call Yvonne Johnson at ATLANTIC IMAGING GROUP when your center gains this capability

If you have any questions, please call Denise Kanze or Yvonne Johnson at 732-380-1144.
